FAITH

ARTIST BIO

Okay Dylan is the recording project of Dylan, the founder and chief architect of Okay Universe. Dylan makes synth-metal, alternative, and faith-inflected music — records built for a generation navigating systems that were designed for someone else. His music sits at the intersection of spiritual searching and technological acceleration, anchored by heavy production and high-contrast lyrics. Dylan is also the builder behind Okay Universe's AI-native infrastructure: the same person making the music built the system that serves it. Streaming on Spotify, Apple Music, and all major platforms.
